MODERN LUXURY SPOTLIGHT

## Sub-Zero, Wolf, and Cove

Scottsdale Showroom

Sub-Zero, the food preservation specialist, pioneers technology that keeps food fresher longer. Wolf, the cooking specialist, delivers control so precise delicious results are practically ensured. Cove, the cleaning specialist, guarantees spotlessly clean dishes and near-silent operation. When it comes to performance, design, and customer care, these three specialists are of one mind. They are built with premium-grade materials, tested to perform for decades, thoughtfully and beautifully designed, and backed by the dedication of our family-owned company.

Decades after the company was founded in 1945, it still lives by the words of its founder Westye F. Bakke: "If you build a quality product, you will always have customers." It operates its own manufacturing facilities in the U.S., builds products with premium-grade materials, and tests them to ensure performance and longevity.

While its company's commitment to quality, performance, design and customer care is unchanged, the company's Scottsdale Showroom is undergoing a major down-to-the-studs remodel, adding almost 2,500-square-feet of showroom space, and enlisting more than 16 local designers and cabinet companies as project partners. We are fortunate enough to have such great talent and partners in our local Phoenix area design community and are really excited to be able to showcase their talents throughout our showroom.

This is no ordinary showroom. It is an immersive experience to help patrons realize the possibilities of their future kitchen. Whether you connect with us in person or virtually, a helpful and knowledgeable consultant will cater the visit to your precise needs, helping you discover what your kitchen might feel, look, and taste like. The showroom matches its best-in-class service with top-notch products, like the completely redesigned and refined Classic Series Refrigeration, now with a fresh suite of innovative features complementing its signature high level of performance.

Long at the forefront of innovation, the company also aspires to be a leader in both food preservation and the preservation of the planet, with a variety of effective eco-friendly protocols and practices, and a commitment to carrying many Energy Star rated appliances. We strive to deliver not only a stunning, high-performing kitchen, but an innovation to embrace every delicious moment of life.
